

MOVING WORDS: INTEGRATING DANCE AND WRITING FOR CREATIVE EXPRESSION Grade Band: 2-3

Content Focus: Dance & ELA

LEARNING DESCRIPTION

Integrating dance and choreography into writing can enhance the narrative by adding dynamic expression, rhythm, and movement to the storytelling process. The purpose of integration is for students to watch dance and use context clues to identify the main idea and supporting details. Students will also use brainstorming, identifying a main idea and supporting details, as a device to create choreography.

LEARNING TARGETS

Essential Questions	"I Can" Statements
How can identifying the main idea and supporting details in choreography enhance our understanding and interpretation of a dance performance?	I can identify the main idea and supporting details in a text, conversation, or performance to better understand and explain its overall message.
How can I use the elements of dance to tell a story?	I can use the main idea and supporting details to create choreography.

GEORGIA STANDARDS

Curriculum Standards	Arts Standards
Grade 2: 2.T.T.1.b Identify the major plot events that occur between a problem and solution.	ESD.CR.1 Demonstrate an understanding of the choreographic process.
2.T.T.1.e Use knowledge of narrative techniques (e.g., characters, settings, events, dialogue) to create texts that recount real or	ESD.CR.2 Demonstrate an understanding of dance as a form of communication.
imagined experiences and events with a sense of closure.	ESD.RE.1 Demonstrate critical and creative thinking in dance
Grade 3: 3.T.T.1.b Explain how characters, setting, problem, and solution function in the plot. 3.T.T.1.e Apply narrative techniques (e.g., character, setting, problem, resolution, dialogue) to develop a real or imagined experience using descriptive details, clear event sequences, and a sense of closure.	ESD.CN.1 Identify connections between dance and other areas of knowledge.

SOUTH CAROLINA STANDARDS

Curriculum Standards	Arts Standards
Grade 2: ELA.2.OE.3 Make inferences to support comprehension. ELA.2.AOR.6.1 Retell a text to enhance	Anchor Standard 1: I can use movement exploration to discover and create artistic ideas and works.
comprehension: a. include main story elements in a logical	Anchor Standard 2: I can choreograph a dance.
sequence for a literary text; and b. include a central idea and supporting details for an informational text.	Anchor Standard 3: I can perform movements using the dance elements.
Grade 3: ELA.3.OE.3 Make inferences to support comprehension.	Anchor Standard 5: I can describe, analyze, and evaluate a dance.
ELA.3.AOR.6.1 Summarize a text to enhance comprehension:	
a. include plot, theme, and key details for a literary text; and b. include a central idea and supporting details for an informational text.	

KEY VOCABULARY

Content Vocabulary	Arts Vocabulary
 <u>Author</u> – A writer of a book, article, or report 	 <u>Choreography</u>: The art of designing and arranging sequences of movements, steps, and gestures to create a dance
Main idea – The main idea is the central point or message of a text	piece

- <u>Supporting detail</u> The statements that support (go along with) the main idea
- <u>Setting</u> The place or type of surroundings where something is positioned or where an event takes place
- <u>Character</u> A person in a novel, play, or movie

- <u>Choreographer</u> The person who designs or creates a dance piece
- Body The dancer's body and how it is used

• Types of energy:

- <u>Percussive</u> Refers to the quality of movement characterized by sharp starts and stops;staccato jabs of energy
- Suspended Occurs in a moment of resistance to gravity, such as the instant in which a dancer hangs in space at the top of a leap
- Sustained Smooth and unaccented; there is not apparent start or stop, only a continuity of energy
- Swinging Established by a fall of gravity, a gain in momentum, a loss of momentum, and the repeated cycle of fall and recovery, like that of a pendulum
- <u>Vibratory</u> A quality of movement characterized by rapidly repeated bursts of percussive movements like "a jitter"

Space:

- <u>Level</u> One of the aspects of movement (there are three basic levels in dance: high, middle, and low)
- Pathway Designs traced on the floor as a dancer travels across space; the designs traced in the air as a dancer moves various body parts
- Shape Refers to an interesting and interrelated arrangement of body parts of one dancer; the visual makeup or molding of the body parts of a singular dancer; the overall visible appearance of a

Time:

 Tempo – Refers to the pace or speed of movement

 Action:

 Locomotor – A movement that travels through space

 Non-locomotor – A movement that does not travel through space

MATERIALS

- A selected piece of choreography to watch
- Brainstorm planning bubbles or concept map
- Music
- Paper and pencils

INSTRUCTIONAL DESIGN

Opening/Activating Strategy

- Discuss the similarities between a choreographer and an author, such as how both are creators and storytellers.
- Watch a selected piece of choreography.
- Have students identify the story elements in the choreography—who are the characters? What is the setting? What was the beginning, middle, and end?
- Ask students what they think the dance was about. Ask them what about the dance makes them say that.
 - Have students infer what the choreography was about using supporting details from the choreography.

Work Session

- As a whole group, discuss how choreographers plan choreography just how writers brainstorm for their writing/essay.
- Practice a brainstorm for choreography together exploring different types of movements, levels, and energy qualities (see Arts Vocabulary). Focus on one or two, such as levels and energy qualities.
- As a class, select a topic for their choreography (this could be inspired by a story that the class has read).
- Break students into small groups. Assign each group a part of the story (beginning, middle, end) or a supporting detail from an informational text to express through choreography.
- Have students brainstorm for their choreography using a concept map, web, brainstorming bubbles, or other type of strategy. Have students focus on one or two elements of dance in their choreography, such as energy quality and levels.
 - Discuss/brainstorm examples how they can be used to help express their thoughts/ideas.
- Have students create and share their choreography with the class. Have students present their choreography in sequential order (for example, beginning, middle, end).

- Have students write and/or illustrate the story of their choreography including the main idea and supporting details/plot displayed in the dance.
 - Stories should have characters, setting, and a beginning, middle, and end.

Closing/Reflection

- After watching each group's choreography, the audience (class) will identify how the movements they saw in the choreography expressed the ideas they were trying to convey.
- Students will answer: How did these movements help you understand the main idea/story?

ASSESSMENTS

Formative

- While groups are working on choreography, ask the students questions about their choreography and choreographic choices.
 - O What is the main idea?
 - What supporting details/plot are in your choreography?
 - Have them demonstrate them to you.

Summative

- Ask the choreographers to tell you or write about their choreographic process and how they selected the movements.
- Have students write or illustrate the story of their choreography including the main idea and supporting details/plot displayed in the dance.
 - Stories should have characters, setting, and a beginning, middle, and end.

DIFFERENTIATION

Accelerated: Require students to include at least three movements in their choreography.

Remedial:

- Create a dance collaboratively as a class.
- Limit the number of dance elements required in students' choreography.
- Instead of watching a piece of choreography for the activating strategy, read a story that the dance will be about.

ADDITIONAL RESOURCES

This integrated lesson provides differentiated ideas and activities for educators that are aligned to a sampling of standards. Standards referenced at the time of publishing may differ based on each state's adoption of new standards.
